PROFESSIONAL SUMMARY

Product designer with 7+ years across brand, web, and UI design, focused on B2B SaaS and healthcare since 2025. WCAG 2.1 is a habit, not a checklist. A computer science degree means I can read a spec and have a real conversation with engineering instead of throwing a file over the wall. My 3D and animation background shapes how I prototype: I build the motion instead of describing it. Google UX Design Professional Certificate (2026).

CORE COMPETENCIES

UX/UI: End-to-End Product Design • Interaction Design • Wireframing & Prototyping • Information Architecture • Progressive Disclosure • Responsive & Mobile Design • Data Visualization

Tools: Figma (Dev Mode) • Lottielab • Adobe CC (Ps, Ai, Ae) • Autodesk Maya • Unreal Engine 5 • HTML/CSS • Python • SQL

Process: WCAG 2.1 • Design Systems • Component Libraries • Agile/Scrum • User Research • Usability Testing • Localization • Design-to-Dev Handoff

PROFESSIONAL EXPERIENCE

Freelance Designer | Self-Employed (Remote) / Nov 2018 – Present

- 100+ client projects across UI design, brand identity, responsive web, and motion graphics for education, creative-services, and tech clients. Level 2 Fiverr seller, 4.8–5.0 rating sustained over seven years.
- Worked directly with clients with no PM or design lead in between, so scoping, feedback, and delivery were all mine to manage.
- Completed the Google UX Design Professional Certificate (Jan 2026) and rebuilt my practice around end-to-end product work: research, information architecture, prototyping, and accessibility audit.

Product Designer (Intern) | GoMAXPAIN / HelpAfterAccident, Orlando, FL (Remote) / Apr 2026 – Jun 2026

B2B SaaS legal-medical referral platform. Designs approved for production; product built and in pre-launch.

- Designed a 15-step onboarding flow (identity verification, practice setup, team configuration) for a platform marketed as serving 5,000+ verified lawyers and doctors: one task per screen, completing in under two minutes despite collecting 10+ data points.
- Mapped a shared authentication trunk branched across five user types (doctors, lawyers, patients, marketers, influencers) so engineering builds the flow once instead of five times.
- Built and tested four patient intake models before landing on one that holds up for someone filling it in right after a car accident.
- Shipped a reusable multi-select pill component across four profile sections; documented every state and spec, and engineering built it with no clarifying questions.
- Designed a Review & Finish screen pulling six setup categories into one view, plus inline password validation and SMS/WhatsApp 2FA within legal compliance constraints. Built for 10+ languages and multiple payment types from day one.

UX & Visual Designer (Intern) | Visual Thinkers, London, ON / Mar 2025 – May 2025

- Audited and redesigned the agency homepage for hierarchy and accessibility; built responsive components in Figma, then implemented them in WordPress with HTML/CSS. Meets WCAG 2.1.
- Defined shared type scale, spacing, and component patterns adopted across three concurrent client projects, stopping visual drift between web and social content.
- Ran the content production workflow in Notion across design, copy, and marketing, keeping 3+ projects on schedule on a small team.

Graphic Designer | Center for Development of IT Professionals (CDIP), UIU, Bangladesh / Mar 2017 – Dec 2021

- Produced visual design and illustration for the university's IT training centre: posters, event branding, and course materials. Built fundamentals in typography, visual communication, and brand systems.

SELF-INITIATED PROJECTS

AI Health Link Canada (HealthTech): AI-assisted triage, digital health vault, and care booking across virtual and walk-in providers. Progressive disclosure kept clinical completeness without overwhelming anxious patients. 17 screens across mobile and tablet, closed with a WCAG 2.1 self-audit.

Creative Asset & Video Workflow (B2B SaaS): Video production workflow tool: Kanban production board, smart task cards, and a no-login review room where clients leave timestamped, frame-accurate feedback from a link. Research drawn from editor interviews and my own motion-graphics background.

EDUCATION

Post-Graduate Certificate, Visual Effects & Editing for Contemporary Media | Fanshawe College, London, ON | 2025

Post-Graduate Certificate, 3D Animation & Character Design | Fanshawe College, London, ON | 2024

BSc, Computer Science & Engineering | United International University, Dhaka, Bangladesh | 2021

CERTIFICATIONS

Google UX Design Professional Certificate (2026) • Adobe Illustrator & Premiere Pro (2025) • HubSpot Inbound Marketing
