

NOIBEDYA NARAYAN RAY

Product Designer · UX/UI · B2B SaaS & HealthTech

London, ON, Canada · +1 (437) 661-4804 · nnr1011@outlook.com · [linkedin.com/in/noibedya](https://www.linkedin.com/in/noibedya) · noibedya.com

SUMMARY

Product designer with a computer science degree and six years of client design work behind me: brand, web, and motion first, product design now. I work on the flows people can't skip (onboarding, intake, signup) and shipped them for a US legal-medical referral platform in 2026. I prototype motion instead of describing it, and I can read a spec well enough to have a real conversation with engineering. WCAG 2.1 is a habit, not a checklist.

CORE SKILLS

Design: End-to-end product design · interaction design · wireframing and prototyping · information architecture · data visualization · design systems and component libraries · user research · usability testing · WCAG 2.1

Tools: Figma (incl. Dev Mode) · Lottielab · Adobe Photoshop, Illustrator, After Effects · HTML/CSS

Ways of working: Agile/Scrum · design critique · design-to-dev handoff

EXPERIENCE

Product Design Intern | GoMAXPAIN (legal-medical platform), Remote Apr – Jun 2026

- Designed onboarding and intake for five user types (doctors, lawyers, patients, marketers, influencers) on one shared component system: 100+ screens across mobile and desktop, delivered in two weeks and approved for production.
- Broke a 15-step professional signup into single-task screens designed to finish in under two minutes, and validated the pacing in prototype walkthroughs.
- Designed four patient intake models for people filling out forms right after a car accident; the version chosen after internal testing went live.
- Documented every component state and spec for engineering handoff, including inline password validation, SMS 2FA, and flows localized for 10+ languages and 3 payment types.

UX & Visual Designer | Visual Thinkers, London, ON Mar – May 2025

- Redesigned the agency homepage for hierarchy and accessibility, then built it myself in WordPress with HTML and CSS. It meets WCAG 2.1.
- Defined the type scale, spacing, and component patterns that three concurrent client projects adopted.

Freelance Designer | Self-employed, remote Nov 2018 – Present

- 100+ client projects: brand identity, responsive web and UI design, and motion graphics. Level 2 seller on Fiverr, rated between 4.8 and 5.0.
- Built a motion and 3D practice (After Effects, Autodesk Maya) that now shapes how I prototype animation states and explain interaction timing to developers.

SELECTED PROJECTS (CASE STUDIES AT NOIBEDYA.COM)

AI HealthLink (healthcare concept): AI symptom triage with an emergency gate, a personal health vault, and care booking across virtual and walk-in providers. 17 screens on mobile and tablet, closed with a WCAG self-audit.

Creative Asset & Video Workflow (B2B SaaS concept): A video production board with smart task cards and a no-login review room where clients leave timestamped feedback. Research came from interviews with video editors and my own motion work.

EDUCATION

Post-Graduate Certificate, VFX & 3D Animation, Fanshawe College, London, ON 2023 – 2025

BSc, Computer Science & Engineering, United International University, Dhaka 2016 – 2021

CERTIFICATIONS

Google UX Design Professional Certificate (2026) · Adobe Illustrator & Premiere Pro (2025) · HubSpot Inbound Marketing
